The WSK Euro Series moves to the Atlantic Coast

Here we are at the second round of the WSK Euro Series 2011 consisting in the sixth year for the karting series that WSK Promotion organizes and promotes. After the opening in Sarno, Italy, at the beginning of March, the European karting circus moves now to the Circuito Internacional do Algarve, Portimao, in the south of Portugal. Specific features characterize the facility that combines tourist attraction of this region bordering the Atlantic coast and unusual cohabitation with a large motor racing circuit, which is located inside the same big Portuguese complex.

The 260 registered drivers are divided into the 3 classes KF1, KF2 and KF3 equipped with continuous clutch, and into the classes with six-speed gearbox. It is really a large world delegation the one reaching Portimao, with drivers of well 34 different countries from Asia, Americas and Europe.
